# Money Counter Recording System

[IP CCTV SYSTEM]

Even Full HD cameras can not recognize the counter digit of money counters.

It's only possible to recognize in Counter Recorder.

\* This image is Hanabank Gang-nam branch recording display

The counter recorder is a device that enables you to search the money counter amount ((number of bills) together when you search for money counter data by overlapping on installed CCTV images.

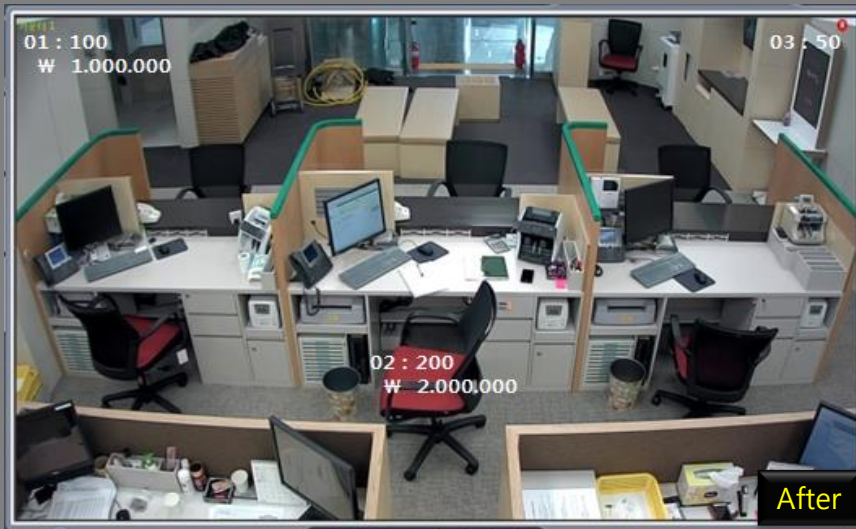

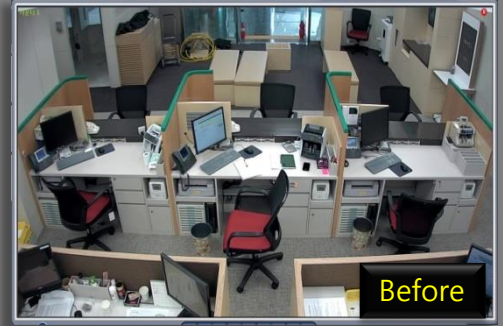

# Counter Recorder

# solution?

The bank counter recording system could be used as evidence data when it happens to disputes with customers by simultaneously researching the bill count amount after recording of transactions between bank clerk and customer.

KRW 10,000 100pieces  
Total amount ₩1,000,000 display

This is a comparison picture of before and after counter recorder, and the camera is Full HD 2.1MP
